APPENDIX

Vol. 31, No. 16 April 21, 1972

THE CATALOGING IN PUBLICATION PROGRAM
A LIST OF PARTICIPATING PUBLISHERS AND DIVISIONS

On July 1, 1971, the Library of Congress received a $400,000 matching grant from the National Endowment for the Humanities and the Council on Library Resources, Inc., for the Cataloging in Publication Program. The Endowment and the Council each contributed $200,000. The purpose of CIP is to provide professional cataloging data to publishers so that the data will be printed in the book. Because CIP will reduce cataloging costs and speed the delivery of books to readers, it should be of benefit to the library world and the publishing industry alike. The goal of CIP is to provide Library of Congress Cataloging in Publication Data at an annual rate of 30,000 titles by June 30, 1973.

The following list of publishers is current as of April 11. Librarians should note that titles from participating publishers will eventually bear Library of Congress Cataloging Publication Data on their copyright pages. There will be a period of time, which will vary from publisher to publisher, before their new titles can be fully phased into the CIP Program; titles which were too far into the publishers' production schedules will not include Library of Congress Cataloging in Publication Data. Publishers will be encouraged to use a readily identifiable symbol using the CIP acronym to denote CIP titles in their advertising and catalogs.
